

ioTRAKK UHF SMART CABINET

In today's fast paced environment, managing assets effectively is crucial for any organization. Manual handling of high value assets is a challenge. ioTRAKK UHF Smart Cabinets will help revolutionize the way you monitor your assets. ioTRAKK UHF Smart Cabinet leverages the power of UHF RFID technology to deliver precision and automation, streamlining your operations and maximizing efficiency.

Features:

- Real time tracking: Precisely monitor asset locations and quantities within the cabinet.
- Automatic inventory updates: Eliminate manual counts and reduce human error.
- Stock level alerts: Receive notifications when items are running low.
- Streamlined processes: No more need for human intervention for asset issuances, returns and inventory.

- Faster item retrieval: Quickly locate items using RFID technology.
- Customizable design: Can be tailored to specific needs depending on industry or application.
- Integration with ioAsset™: Provides audit trails on asset issuance and return transaction.
- Asset accountability: Each specific asset retrieved or returned will automatically be accounted to the user.

Specifications:

Frequency Range	902-928 MHz (FCC) 918-920 MHz (Philippines)
Operating Temperature	0 to +60 C
System	Windows/Android (Optional)
Protocol	EPC C1G2, ISO 18000-6B, ISO 18000-6C

Applications:

- Tool Monitoring

- Healthcare Assets and Supplies Monitoring

- Document Tracking
